

**JEANNIE A. MOLATO, DMD INC.**  
**7133 Sepulveda, Blvd. Van Nuys, CA 91405**  
**(818)988-8184**

**AFTER FINAL CEMENTATION INSTRUCTIONS:**

1. Brush twice a day and floss between teeth and crown/fixed bridge or veneer daily.
2. Use a floss threader to clean under the bridge.
3. Use of water pick (water flosser) is recommended for fixed bridge.
4. Use of fluoride rinses such as ACT or smart rinse is highly recommended to prevent decay along the margins.
5. In any event that your crown, bridge or veneer gets loose, please do not attempt to re-cement them with commercially available adhesive such as super glue since it may be toxic when ingested and it may damage the tooth structure. Do not attempt to wear your loose crown/bridge or veneer to prevent you from swallowing it accidentally. Please come to our office for re-cementation.
6. We recommend that you come every 6 months for oral prophylaxis and check up to maintain good oral health.

We appreciate your continuous trust and confidence to our dental practice. We hope that you could share your wonderful experience with us to your friends and family. The highest compliment you can give our staff is your referrals. We thank you again for choosing Dr. Jeannie Molato Dental Office.
